

FOSSIL CREEK CHIROPRACTIC

Dr. Jessica M. Christopherson Dr. Scott C. Morrison

INFORMED CONSENT Doctor-Patient Relationship in Chiropractic

Chiropractic

It is important to acknowledge the difference between the health care specialties of chiropractic, osteopathy and medicine. Chiropractic health care seeks to restore health through natural means without the use of medicine or surgery. This gives the body maximum opportunity to utilize its inherent recuperative powers. The success of the chiropractic doctor's procedures often depends on the environment, underlying causes, physical and spinal conditions. It is important to understand what to expect from chiropractic health care services.

Analysis

A doctor of chiropractic conducts a clinical analysis for the express purpose of determining whether there is evidence of Vertebral Subluxation Syndrome (VSS) or Vertebral Subluxation Complexes (VSC). When such VSS and VSC complexes are found, chiropractic adjustments and ancillary procedures may be given in an attempt to restore spinal integrity. It is the chiropractic premise that spinal alignment allows nerve transmission throughout the body and gives the body an opportunity to use its inherent recuperative powers. Due to the complexities of nature, no doctor can promise you specific results. This depends upon the inherent recuperative powers of the body.

Diagnosis

Although doctors of chiropractic are experts in chiropractic diagnosis, the VSS and VSC, they are not internal medical specialists. Every chiropractic patient should be mindful of his/her own symptoms and should secure other opinions if he/she has any concern as to the nature of his/her total condition. Your doctor of chiropractic may express an opinion as to whether or not you should take this step, but you are responsible for the final decision.

INFORMED CONSENT FOR CHIROPRACTIC CARE

A patient, in coming to the doctor of chiropractic, gives the doctor permission and authority to care for the patient in accordance with chiropractic tests, diagnosis, and analysis. The chiropractic adjustment or other clinical procedures are usually beneficial and seldom cause any problem. In rare cases, underlying physical defects, deformities or pathologies may render the patient susceptible to injury. The doctor, of course, will not give a chiropractic adjustment, or health care, if he/she is aware that such care may be contraindicated. Again, it is the responsibility of the patient to make it known or to learn through health care procedures whatever he/she is suffering from: latent pathological defects, illnesses or deformities which would otherwise not come to the attention of the doctor of chiropractic. The patient should look to the correct specialist for the proper diagnostic and clinical procedures. The doctor of chiropractic provides a specialized, non-duplicating health service. The doctor of chiropractic is licensed in a special practice and is available to work with other types of providers in your health care regime.

Results

The purpose of chiropractic services is to promote natural health through the reduction of the VSS and VSC. Since there are so many variables, it is difficult to predict the time schedule or efficacy of the chiropractic procedures. Sometimes the response is phenomenal.

In most cases there is a more gradual, but quite satisfactory response. Occasionally, the results are less than expected. Two or more similar conditions may respond differently to the same chiropractic care. Many medical failures find quick relief through chiropractic. In turn, we must admit that conditions which do not respond to chiropractic care may come under the control or be helped through medical science. The fact is that the science of chiropractic and medicine may never be so exact as to provide definite answers to all problems. Both have made great strides in alleviating pain and controlling disease.

To the Patient:

Please discuss any questions or problems with the doctor *before* signing this statement of policy. I have read, and understand the foregoing.

TERMS OF ACCEPTANCE

When a patient seeks chiropractic health care and we accept a patient for such care, it is essential for both to be working towards the same objective.

Chiropractic has only one goal. It is important that each patient understands both the objective and the method that will be used to attain it. This will prevent any confusion or disappointment.

Adjustment: An adjustment is the specific application of forces to facilitate the body's correction of vertebral subluxation. Our chiropractic method of correction is by specific adjustments of the spine.

Health: A state of optimal physical, mental and social wellbeing, not merely the absence of infirmity.

Vertebral Subluxation: A misalignment of one or more of the 24 vertebra in the spinal column which causes alteration of nerve function and interference to the transmission of mental impulses, resulting in a lessening of the body's innate ability to express its maximum health potential.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxation. However, if during the course of a chiropractic spinal examination, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of a health care provider who specializes in that area.

Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. OUR ONLY PRACTICE OBJECTIVE is to eliminate a major interference to the expression of the body's innate wisdom. Our only method is specific adjusting to correct vertebral subluxations.

I, _____, have read and fully understand the above statements.
(print name)

All questions regarding the doctor's objectives pertaining to my care in this office have been answered to my complete satisfaction.

I therefore accept chiropractic care on this basis.
